PROFESSIONAL SUMMARY

Software engineering graduate student with 3+ years of engineering experience developing and supporting complex simulation systems in the aviation industry. Skilled in Java, Python, JavaScript, REST APIs, SQL, and full-stack application development. Experienced in translating real-world engineering problems into scalable solutions through software development, data analysis, and system design. Currently pursuing a Master's in Software Engineering while building production-style software projects focused on financial technology and web applications

SKILLS

Languages: Java • JavaScript • Python • C++ • C# • HTML/CSS • SQL

Libraries/Tools: Spring Boot • Pandas • React • Flask

Databases/Cloud & Tools: MySQL • MongoDB • PostgreSQL • Git • AWS • REST APIs

Engineering/Business: SolidWorks • Inventor • Microsoft Office • Financial Modeling • Leadership

PROJECTS

Financial Analytics/Portfolio Tracker (Tech: Java, Spring Boot, React, PostgreSQL, REST APIs)

- Developed a full-stack financial analytics platform for tracking investment portfolios and calculating real-time performance metrics
- Built RESTful APIs using Spring Boot to manage portfolio assets, valuation calculations, and financial reporting
- Implemented financial calculations including CAGR, volatility analysis, portfolio allocation, and performance tracking

Blog Website (Tech: Python, Flask, SQL, HTML/CSS)

- Developed a full-stack blog platform supporting user authentication, content management, and profile customization
- Implemented secure credential verification and session-based authentication workflows
- Designed database models for user accounts, blog posts, and content persistence

Financial Planner (Tech: JavaScript, React, Python)

- Developed a personal finance planning application that models long-term savings and investment growth scenarios
- Generated personalized financial recommendations based on spending, savings, and investment strategies
- Designed responsive user interfaces for financial data visualization and planning workflows

EDUCATION

Master's in Software Engineering (Current)

Grand Canyon University | October 2025 – April 2027

GPA: 4.0

Bachelor's in Mechanical Engineering - Energy Specialization

Southern Illinois University | August 2017- December 2021

GPA: 3.64

EXPERIENCE

Mechanical Engineer (Current)

Frasca Flight Simulation | June 2023 – Present | Urbana, IL

- Designed components to replicate the aircraft components
- Implement new mechanical engineering concepts to new designs
- Collaborate with software engineers, systems engineers, and mechanical engineers to ensure alignment between simulator hardware and software functionality
- Translate system-level requirements between software and mechanical engineering teams during simulator development efforts

Mechanical Engineer

All Pro HVAC | September 2022 - June 2023 | Tuscola, IL

- Perform heat load calculations for new developments
- Design ductwork for proper air distribution and pressure equalization
