

Logan Grace

[Logan Grace | LinkedIn](#) | [LGrace9784 · GitHub](#) | Portfolio: <https://lgrace9784.github.io/>

Skills

Languages: Java • JavaScript • Python • C++ • C# • HTML/CSS • SQL

Libraries/Tools: Spring Boot • Pandas • React • Flask

Databases/Cloud & Tools: MySQL • MongoDB • PostgreSQL • Git • AWS • REST APIs

Engineering/Business: SolidWorks • Inventor • Microsoft Office • Financial Modeling • Leadership

Projects

Financial Analytics/Portfolio Tracker

(Tech: Java, Spring Boot, React, PostgreSQL, REST APIs)

- Developed a full-stack financial analytics platform for tracking investment portfolios and calculating real-time performance metrics
- Built RESTful APIs using Spring Boot to manage portfolio assets, valuation calculations, and financial reporting
- Implemented financial calculations including CAGR, volatility analysis, portfolio allocation, and performance tracking

Blog Website

(Tech: Python, Flask, SQL, HTML/CSS)

- Developed a full-stack blog platform supporting user authentication, content management, and profile customization
- Implemented secure credential verification and session-based authentication workflows
- Designed database models for user accounts, blog posts, and content persistence

Financial Planner

(Tech: JavaScript, React, Python)

- Developed a personal finance planning application that models long-term savings and investment growth scenarios
- Generated personalized financial recommendations based on spending, savings, and investment strategies
- Designed responsive user interfaces for financial data visualization and planning workflows

Education

Master of Science (M.S.) in Software Engineering

Grand Canyon University | GPA 4.0

April 2027

Pheonix, AZ

Bachelor of Science (B.S.) in Mechanical Engineering

Southern Illinois University – Carbondale | GPA 3.64

December 2021

Carbondale, IL

Experience

Frasca Flight Simulation

Urbana, IL

Mechanical Engineer

June 2023 – Current

- Designed components to replicate the aircraft components
- Implement new mechanical engineering concepts to new designs
- Collaborate with software engineers, systems engineers, and mechanical engineers to ensure alignment between simulator hardware and software functionality
- Translate system-level requirements between software and mechanical engineering teams during simulator development efforts

All Pro HVAC

Tuscola, IL

Mechanical Engineer

September 2022 – June 2023

- Perform heat load calculations for new developments
- Design ductwork for proper air distribution and pressure equalization
